# ONCOLOGY DAY REHABILITATION

Our Oncology Rehabilitation Day Program aims to reduce the impact of cancer treatments on the body and mind, plus improve function in day-to-day life activities and quality of life.

We support you throughout your cancer journey.

Our team works in partnership with your own GP and treating Specialist to help you navigate through this challenging time. We provide a structured yet personalised program to improve your physical condition and provide you with the knowledge to get you back on your feet.

---

## Program structure

- Allied health sessions may include exercise physiology, physiotherapy, occupational therapy, speech pathology, dietitian or psychology
- Your program will be tailored to your needs and according to your health fund
- This program delivers best outcomes if commenced before and continued after your cancer treatments (surgery, radiation, chemotherapy)

---

## How to access the program

Ask your GP or treating Specialist to refer you to Eden Private Hospital's Oncology Rehabilitation Program.

Alternatively, please call 07 5472 6472 and speak to our Day Programs Manager to discuss how we can help you.
